DLF Cybercity From a Vision to Reality

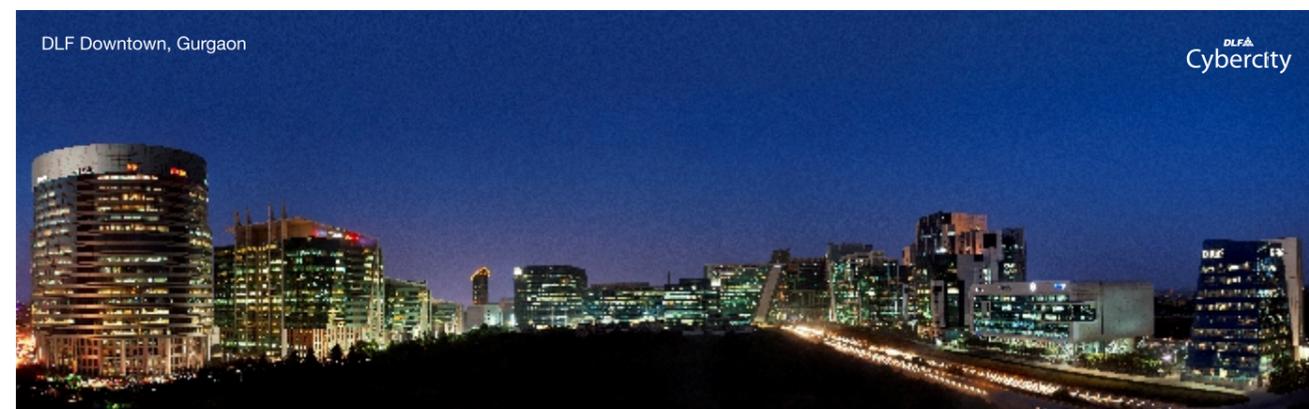

Once upon a time, south of India's capital city New Delhi. The year is 2000. A quiet collection of small villages, over 2000 years old, start to wake up, slowly magnetizing together to form a suburban office district called DLF Cybercity.

Back in 2001, it was crunch time in Delhi, with inadequate infrastructure, underdeveloped buildings, and difficult access. Life in Metro was getting expensive, bottlenecks were adding to the strain, and space was at a premium. India's corporate elite began to demand buildings with better infrastructure, ample parking, a larger floor plate and good building maintenance - Grade 'A' building.

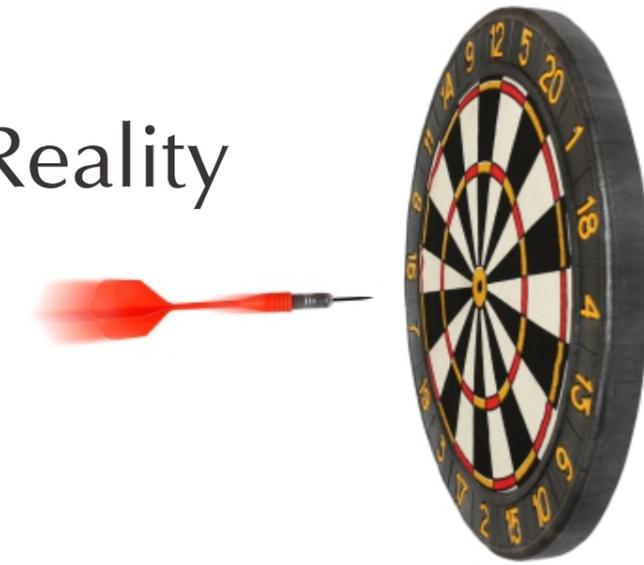

DLF led the way, in Gurgaon, reaching out to migrant companies from Delhi, with buildings that met demand and exceeded expectations.

Almost single-handedly, DLF has converted a sleepy, rural settlement, into its very own DLF City, built itself into the country's largest real estate firm. The group has developed the largest share of residential, official and retail space in Haryana and has been declared, for its pioneering efforts in urban development, planning, and execution, a Super brand.

The biggest leap forward in Gurgaon has been the 125 acres large integrated business district adjacent to Delhi Gurgaon border and on NH-8, called the "DLF Cybercity".

The contents hereof shall not in any manner attach, or be construed to attach, any liability on the originator, its employers or its employer's associated entities, or generated for the purposes of exercising any supervision, control, monitoring over the intended recipient and/ or the recipient organization; and shall not affect the legal, moral, financial, criminal or civil obligations of the intended recipient and/ or the recipient organization in any manner whatsoever. With effect from 1st April, 2013, DLF has outsourced the general maintenance to "Jones Lang LaSalle" and "Cushman & Wakefield" for our leased office buildings portfolio pan India.

The first and most dramatic building to come up, as far back as 10 years ago, is DLF Square. In its fine aura of blue glass and white stone, it became the symbol of the future. Many real estate companies slowly tried to imitate DLF landmark developments, which is now one of the markers of DLF Cybercity, the other being the Gateway Towers (popularly called as "Ship Building"), DLF Cyber Greens and DLF Infinity Towers.

In 2003, Infinity Towers and Cyber Greens came having integrated food courts with other ultra modern facilities and features .

By 2007, a quantum leap in demand occurred. Future expansion was to be factored, and buildings with expansion options became the preference. DLF developed Building 10 with 2.4 million sq ft of space.

As Gurgaon fulfils its destiny as the future city, DLF acts as its flag bearer. As migration from different lands, and of different cultures and people continue into a mega suburb, DLF is there to predict needs, plan infrastructure and accommodate all solutions at one spot- whether office, residence, or shopping.

Flash Forward 2015

Flash forward to 2015, and one of the most coveted corporate office destinations in India. Skywalks, toll-free express way within the city, a privately owned rapid metro within the business district, multi-level car parking, high end retail hub and recreation centres morphing with office infrastructure that is best in the world, easy access and exit and luxurious, safe, inviting and comfortable corporate and industrial environments.

Rapid Metro at DLF Cybercity is likely to commence operations by Q4, 2013

Welcome to future of office spaces!

Amit Grover
National Director - Offices, DLF
grover-amit@dlf.in

- DLF has responded to the growing needs of companies. From the smallest details of attractive building facades to contemporary landscaping, a toll free expressway from DLF Cybercity to Sector 56, and a rapid metro line connecting the business district, our vision is to have a high value destination worth working in, living in, setting up and expanding to business where the best come to work.
- DLF has always been at the forefront of architectural science in India. An example is underground cabling. In the near future, all electrical OHE HT lines will be diverted through underground cabling in a dedicated corridor from NH-8 Junction, Cybercity to Sector 56. It will make the skyline clean, and free up land for wider roads.
- Our focus on regular commuting of workforce to DLF Cybercity is enormous. The completion and commencement of operations of Rapid Metro in Q4, 2013 would add substantial value to the Cybercity office occupants and thereby reducing transport cost, travel time while being in a secured metro environment. This will also reduce parking

requirements of DLF Cybercity. All efforts along the roads (including dedicated paths for pedestrians), signal free underpasses, the 16 lane toll free road, and the skywalks, are all ideas that will keep the city moving, free from blockages. We are looking at the future, and planning for it.

- Dupont is our safety advisor, trainer and partner. We are the only real estate company in India to take the issue of security and safety seriously, have appointed Dupont for safety, and implement far-reaching standards. From helipads (for emergency evacuation), to a two tier sprinkler system, disaster management drills, 90 meter high snorkels, ambulances from reputed hospitals, a three tier security system and CCTVs, we have one of the best disaster management systems in India. So that you can be safe.
- Our focus on energy conservation and green initiatives made us set up an Energy Centre across DLF Cybercity, Gurgaon which aims to cater to all the buildings there. This energy center uses natural gas instead of diesel for power generation that helps to remarkably reduce operating/maintenance cost. Such cost savings are then passed on to DLF occupants/tenants.
- How many private organizations in India have a fire station? Only one. In DLF Cybercity, we have a fully equipped fire station with staff, and a skylift which can reach up to 30 floors and jet streams of water another 30 meters. In case of a fire anywhere in the business district, our fire engines and personnel will reach in the shortest possible time.
- DLF Cybercity is not a small territory. It is over 15 million square feet of space planned as Integrated Business District.
